

# DIAGNOSTIC SOFTWARE FOR BUSINESS PROCESS TRANSFORMATION BASED ON LEAN SIX SIGMA

## Open Orbit Clever Meets Simple

Get to insights faster, tell the story better  
Demystify process excellence  
Make it accessible to the whole organisation

- Drastically reduce cost and time to value of transformation projects
- Improve standardisation and reuse of insights in your team

- Investigate the most optimum metrics, causes and solutions; access context-specific and pre-curated research
- Reduce non-value-adding activities in the project, improve engagement between the project team and the larger organisation
- Leverage your team's expertise, enable them to build industry reputation and connections
- Reduce time to expertise of new team members

### MENTORED THINKING ALGORITHM HELPS DIAGNOSE PROBLEMS FASTER

- Recommends the right metrics, causes and solutions to investigate
- Connects to external research
- Connects people solving similar problems
- Learns and refines itself over time by harvesting trends of usage

### UNIQUE DATA MODEL SIMPLIFIES ANALYSIS

- Standardises problem formulation
- Enables sharp diagnostics using a combination of value stream mapping, root cause analysis and solution hypothesis frameworks
- Enables focus on "vital signs" of your business process

### REPORTING FEATURES DRIVE COLLABORATION

- Provide engagement and communication with all stakeholders
- Focus on outcomes and insights, not tasks and deliverables
- Customisable and flexible methodologies for tracking projects
- Enable searching through the repository of your past projects without ever having to update a best-practice database

### EASE OF DEPLOYMENT

- Intuitive, easy to use and comes with in-line tutorials, instant chat support, and help documentation.
- Hosted on enterprise class, SOC-II and HIPAA compliant infrastructure; does not require any transaction level or customer-sensitive data
- Your intellectual property protected at all times
